# Function in Factory

it is a function in factory class within the
project in code line between 108-->117.

N0

int ID -->108
int i

N1   for loop

i < EmployeeList.size()

i >= EmployeeList.size()

if
condition

N2

N5

ID == EmployeeList.get(i).getID()

ID != EmployeeList.get(i).getID()

return true

N3

N4   i++

the code

```
}
        for (int i = 0; i < EmployeeList.size(); i++) {
        if (ID == EmployeeList.get(i).getID()) {

        return true;
        }

        }
        return false;
        }
```
